**REQUIREMENTS OF AIR QUALITY - LIVESTOCK MANAGEMENT CONCERN:**

- ☐ The 2002 Farm Bill requires that an EQIP plan of operations that includes an animal waste management facility will provide for the development and implementation of a comprehensive nutrient management plan (CNMP).
- ☐ The National Pollutant Discharge Elimination System (NPDES) definition of an animal feeding operation (AFO) is:
- \* lot or facility where animals have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12 month period.
  - \* where crops, vegetation, forage growth, or post-harvest residues are not sustained over any portion of the lot facility in the normal growing season.
  - \* an animal feeding operation may also be designated as confined animal feeding operation (CAFO) if:
    - \* more than 1000 animal units (AU) are confined at the facility, OR
    - \* from 301 to 1000 AU are confined at the facility and it also meets one of the specific criteria addressing the method of discharge.

**HIGH CATEGORY**

* Application is for an animal waste management facility, which is part of a CNMP that provides treatment for an existing animal feeding operation (AFO) that has not been treated previously.	
<b>AND</b>	
* Livestock waste applications will result in the injection, incorporation or subsurface application at a minimum of two inches below the soil surface.	
<b>AND</b>	
* Livestock waste storage facilities will incorporate at least one or a combination of the following practices; Composting Facility, Manure Transfer, Waste Treatment Lagoon, Waste Storage Facility, Sediment Basin (solid settling basin), Constructed Wetland, or Irrigation System-Microirrigation that is/are specifically designed to control or reduce odor.	
	Distance from nearest population center (1) _____ AU _____ \$/AU

**MEDIUM CATEGORY**

* Application is for an animal waste management facility, which is part of a CNMP that provides treatment for an existing animal feeding operation (AFO) that has not been treated previously.	
<b>AND</b>	
* Livestock waste applications will result in the injection, incorporation or subsurface application at a minimum of two inches below the soil surface.	
<b>or</b>	
* Livestock waste storage facilities will incorporate at least one or a combination of the following practices; Composting Facility, Manure Transfer, Waste Treatment Lagoon, Waste Storage Facility, Sediment Basin (solid settling basin), Constructed Wetland, or Irrigation System-Microirrigation that is/are specifically designed to control or reduce odor.	
	Distance from nearest population center (1) _____ AU _____ \$/AU

**LOW CATEGORY**

* Application is for an animal waste management facility, which is part of a CNMP that provides treatment for an existing animal feeding operation (AFO) that has not been treated previously.	
<b>AND</b>	
* Application is for an animal waste management facility to incorporate at least one or a combination of the following practices; Windbreak/Shelterbelt Establishment, Filter Strip, Irrigation System-Sprinkler (modification from High Pressure to Low Pressure systems with drop nozzles), or Wastewater Treatment Strip that is/are specifically designed to control or reduce odor.	
	Distance from nearest population center (1) _____ AU _____ \$/AU
